THE CLASS OF 1957

A statistical analysis of where they are and what they are doing

By DOROTHY M. SMITH, '29
Director, Bureau of Appointments

THE CLASS OF 1957 has scattered throughout the world: to 35 states, District of Columbia, Hawaii, and 16 foreign countries (Germany 5, France 4, Canada 3, England, Japan, India, Venezuela, Taiwan, Switzerland, Turkey, Korea, Norway, Mexico, Jordan, Holland, Denmark). A total of 32 are studying or working abroad.

Distribution

In the United States, the largest number (113) are located in Ohio, while New York has 81, Illinois 32, Michigan 27, Connecticut 24, Pennsylvania 21, Massachusetts 19. New York City and its suburbs claim the largest group (44), with Cleveland (36), New Haven (20), and Boston (16) following.

Marriages

Early marriages continue with 22 per cent of the class now married (38 men, 50 women). Thirteen couples are classmates, 4 others married former classmates, 32 married Oberlinians from other classes (including 11 from 1956 and 9 from 1958), and 26 have taken "non-Oberlin" wives or husbands. Twenty-two others have reported engagements, with weddings planned within the next year. Only 11 wives are full-time homemakers; 3 are graduate students, and the others are employed.

Bureau of Appointments Aid

In making plans for graduate study and employment, almost all the class made use of one or more services of the Bureau of Appointments. Of those employed, 26 per cent secured their positions through specific notices from the Bureau of Appointments, 26 per cent through direct application by letter or in person, and 16 per cent through information from friends (often Oberlin graduates or students). The others found work through relatives, other college bureaus, self-employment, agencies, employers, civil service exams, Career Conference contacts, or "pavement pounding."

Salaries

Salaries vary widely with geographical area and type of employer, but in general are slightly higher than in 1956. (Since salaries abroad are difficult to estimate accurately, our study includes only positions in the United States.) They range from $3240 to $4265 for teachers; $2080-$4160 for women and $3720-$6000 for men in business

and industry; and $2300-$6000 for other fields (social work, government, science, library work, et cetera). Median salaries for teachers increased to $4000. For other occupations, the median for men was $4500 and for women $3360. The highest salaries were in sales and in industrial science and mathematics.

College of Arts and Sciences

The occupational distribution of those holding A.B. degrees is:

	Men		Women	
	No.	%	No.	%
Post-collegiate study	121	70	48	31
Employed	29	16	97	69
Military Service	15	9	–	–
No work sought	–	–	8	5
Seeking employment	3	2	1	1
No information	5	3	0	–
	173	100	154	100

Post-Collegiate Study

Of the 169 in post-collegiate study, 74 are in "academic" fields — sciences 31, languages 13, social sciences 11, psychology 5, philosophy 4, mathematics 3, fine arts 3, and others, for a total of 21 specific fields. Eighty-nine others are in professional study — medicine 27, law 16, theology 10, social work 8, business administration 7, education 8, retailing, nursing, library, theater, architecture, industrial relations, music, engineering, and occupational therapy. Five girls are enrolled for secretarial study and one for medical technology.

Seventy-one (45 men, 26 women) are financing part or all of their expenses with graduate awards varying from tuition to full expenses (some of the grants renewable for later years of study). Except for medical study (where no first-year scholarships were granted), half of the group have won awards. In addition to scholarships and assistantships from graduate schools, there are winners of Rhodes, Fulbright, Woodrow Wilson, French Government, German Government, National Science Foundation, Social Science Research Council, and Ford Foundation fellowships (6 men, 9 women).

The class has scattered to 66 schools — 54 colleges and universities and 5 special schools in the United States and 7 abroad (Germany, Denmark, England, France, Switzerland). However, half of the students are in 7 schools — Yale 18, Western Reserve 17, Chicago 10, Columbia 10, Harvard-Radcliffe 10, Michigan 9, Cornell 7. (In 1956 the "popular" schools were Harvard, Chicago, Johns Hopkins, Western Reserve, New York, Michigan, Yale and Oberlin, with from 5 to 10 in each.)

Employment

One hundred and twenty-six (29 men, 97 women) are employed. Eight men are teaching, and others are business trainees with insurance companies, research chemists, in technical sales, IBM programming, YMCA work, missile test work, government management intern, reporter, carpenter, and assistant movie director. In addition, several men are employed in business and industrial jobs until their call to military service. (Fifteen men are in service — 3 Marines, 1 Air Force, 11 Army.)

Forty-one girls are teaching — 25 in kindergarten-primary grades, 2 in upper elementary, and 14 in high school and special subjects. Jobs outside the United States are in Hawaii, Japan, France, Germany, India, Taiwan, and Turkey. Twenty are in business: retailing, economic research, banking, publishing, secretarial and general office. Ten are in social work; 7 in federal civil service; 6 in scientific research; 3 in library work; and the others found employment in college administration, American Field Service, historical restoration, museum, journalism, and world politics organizations. Eight are full-time homemakers.

Conservatory of Music

The emphasis on advanced degrees for those planning to teach at the college level is shown by the fact that 24 (almost 50 per cent of the men and 30 per cent of the women) Conservatory graduates are continuing their study this year. Half of this group have assistantships or scholarships. Graduate fields include music education and piano (8 each), organ and voice (2 each), clarinet, music history, theory, and viola (1 each). Fourteen music schools are represented — Indiana 4, Manhattan 3, Illinois 2, Iowa 2, Oberlin 2, Eastman 2, Paris Conservatory (France), Boston, Columbia, Mississippi, New England Conservatory, Arizona, Syracuse, 1 each.

Another 33 per cent (1 man, 24 women) are teaching music — 17 music education, 4 private studios, and 3 applied music in schools. Nine others have positions related to music — orchestra, piano technician, music publishing, music therapy, church music, music office; 5 have elected to secure other types of employment — IBM programmer, Saga food service, YWCA, elementary teaching; 6 men are in military service; 3 women "housewives," and 2 "seeking employment."

Graduate School of Theology

The majority of the graduates of the School of Theology are in the parish ministry — in Ohio, Michigan, Indiana, North and South Dakota, Colorado, Canada, Germany, Japan, and Venezuela. Three are studying toward Ph.D. degrees (including one on a Fulbright Fellowship in Norway), one is working with the American Baptist Convention, one is chaplain at a state mental hospital and one expected to report for duty as an Air Force chaplain in November. Seven denominations are represented — Methodist, Congregational, Evangelical and Reformed, Baptist, Presbyterian, Evangelical United Brethren, and Christian.

After two weeks of school, I have my job almost figured out! I am supposed to find a way to get my charges to speak 'the English' as an American does. . . . Teaching is fun — I like it more and more every day. . . . I arrived in Japan on Sept. 5 aboard the S.S. President Wilson. Jean Anthony, '56, was on the dock to meet me. She is teaching at Baika Jogakuen, not far from me, and is a great help in getting accustomed to the ways of a different culture. . . ."

We lived in a house belonging to a small negro college in Austin. . . . We were working primarily with the Latin community (mostly American born, Spanish speaking, and among the poorer elements of the city). We worked mainly with the children — running a kindergarten class in the mornings and assisting on playgrounds in the afternoons. In August, I was a pick and shovel hand for the Smithsonian Institution's big archaeological salvage program in the Missouri Valley, where hundreds of historic Indian village sites are threatened with destruction by flood-control reservoirs.
